OBJECTIVE

I'm a Frontend Developer and UI/UX Designer passionate about building responsive, user-friendly web interfaces. With strong skills in React, HTML, CSS, and JavaScript, I turn complex ideas into clean, engaging digital experiences. My design background ensures every interface is both functional and visually appealing. Let's create intuitive web solutions that users love!

EDUCATION

BTech at Ajay Kumar Garg Engineering College   2023-2027
(A.P.J Abdul Kalam Technical University)

Junior College at Colonel's Brightland Public School   2022-2023

- ROLE: Manages and create Websites for the events happening around.

Full Stack Developer
- At Apptroid Technologies pvt,ltd.
- ROLE: Create Admin Web Application to monitor and manage. Used Next , Express js , TypeScript , mySql Tech stack .

PROJECTS

Passaver
Used a react js to build the UI , Use the help of local browser storage in order to save password and maintaining privacy of the user , Used a clean and simple UI so that it can be understandable by the user easily.This website just simply saves your password simply in order to always remember them and maintain security and your privacy so that you are always secure and can access your passwords easily.

Portfolio - template
Used React JS , Tailwind CSS and 3D object library of React JS to build a fully functional , interactive portfolio with seamless design and easy recognition pattern . This template is simple yet looks fantastic with its exposure and looks creating a good impact over the viewer.
